State of Alabama (AL)

STATE TECHNICAL TRAINEE

CLASS CODE 11916-000

SALARY $1,182.40 - $1,936.20 Semi-Monthly

$28,377.60 - $46,468.80 Annually

About This Job

This is a limited tenure job in the State service. This is introductory, specialized work in a technical activity of state government.

Employees in this class serve an apprenticeship under the supervision of senior employees in the State service. Assignments are in skilled and/or trades areas such as traffic signal repair work, equipment mechanic work, and communications repair work. Work is performed under the close supervision of an administrative and/or technical superior who assigns projects, gives preliminary instructions, and reviews work in process and upon completion for quality and adherence to established standards.

Job Description

As a State Technical Trainee in the Automated Transportation System Operator position, you will be responsible for work in a Traffic Management Center (TMC) control room monitoring various components of an Automated Transportation System (ATS) and dispatching appropriate response personnel to incidents within the ATS coverage area. Requires strong computer skills, the ability to multitask in a fast-paced environment, excellent verbal and written communication skills, and a commitment to providing professional customer service. Must demonstrate attention to detail, sound judgment, and the ability to remain calm while managing multiple responsibilities.
