### MEMORANDUM

TO: Companies Applying for Annual Construction Permits

FROM: Jesse Wallace *JW*  
Assistant Maintenance Engineer  
Vehicle Enforcement Office

RE: Annual Constuction Permit Requirements

An Annual Construction Permit is available for issuance, to provide continuous 24/7 movement for construction equipment within the project limits, whose weight and/or dimensions do not exceed the following limits:

- Maximum Weight – 150,000 pounds
- Maximum Width – 12 feet
- Maximum Length – 75 feet
- Maximum Height – 14 feet
- Maximum Single Axle Weight – 22,000 pounds

When applying for an Annual Construction Permit, loads exceeding 100,000 pounds will require a Construction Project Authorization, to determine the loads project travel limits. When a Construction Project Authorization is needed, please provide the dimensions and axle load weights for the heaviest piece of equipment that will be transported within the project (not to exceed the maximum limits).

The heaviest load will represent the Construction Project Authorization (project travel limits) for all loads exceeding 100,000 pounds, valid for 24/7 continuous movement.

Annual construction permits will be valid for one year or the duaration of the project, whichever is shorter. If the project duration is longer than one year, the permit will need to be renewed.

JW/as
