

PUBLIC NOTICE

PROJECT: BR-0007(546), TUSCALOOSA COUNTY

**Replace Bridge (BIN 005140) on
AL-7 (US-11) Over Norfolk Southern Railroad**

The Alabama Department of Transportation (ALDOT) is currently in the preliminary engineering phase of replacing the bridge over Norfolk Southern Railroad in Tuscaloosa County. The purpose of this project is to replace a functionally obsolete structure to satisfy current and future traffic volumes. Information about this project is available for the public to review and comment. Your comments may be provided by mail, email, or online form as described below. Your comments on the proposed project must be submitted by **January 14, 2022**.

This project will be replacing the existing 2 lane bridge over the Norfolk Southern Railroad with a 3-lane bridge consisting of two 12' through lanes, a 14' two-way left-turn lane, two 10' shoulders, and a 6' sidewalk on the east side of the bridge. A roadway closure of up to 60 days is anticipated to reduce the footprint of the project and the impact to the traveling public.

Some additional right of way and/or easements will be required. The department is very interested in the potential social, economic and environmental effects of this project; therefore, any comments from groups, individuals, public officials or agencies relative to these effects, both positive and negative, will be considered during development of plans and all subsequent environmental studies.
